The Future is Wild

Four adventurous kids - C.G., Ethan, Emily and Luis are propelled into the future to solve the mysteries behind Earth's evolution while trying to survive extreme climate conditions and dangers from hungry creatures. Be amazed by awesome creatures like elephantine squids that thunder through the forest on their eight massive legs, rabbit-sized snails that don't slither but hop, and wasps so ferocious they can snag a bird in mid-flight. Sounds impossible? This could very well be planet Earth millions of years from now.

Mr. Moon in HD

You know Mr. Moon. We all do. Just look out your window at night - there he is! Climbing up his ladder and taking his place in the star-studded, indigo sky.

But have you ever wondered what Mr. Moon does when he's NOT shining down on us? Well, that my friends, is where our story begins.

Mr. Moon is an adventurer - and with his Supafast Moon Rocket and his best friends Silva and Gold Star, Mr. Moon zips around, exploring planets, stars, constellations, black holes, nebulae and galaxies - no wonder he sometimes loses track of!
